

In the Abstract:

~~The present invention relates to a~~ A film-shaped therapeutic system ~~[(1)]~~ comprising at least two layers connected with each other, for transmucosal administration of active substances~~[(,)]~~. ~~[[which]]~~ The system ~~[(1)]~~ has a layer ~~[(2)]~~ which is mucoadhesive in an aqueous environment and a mono-layered or multi-layered backing layer, ~~(3), at~~ At least one of ~~[[said]]~~ these layers ~~containing~~ contains an active substance~~[(,)]~~. ~~and the said~~ The mucoadhesive layer ~~(2) being~~ is capable of swelling in an aqueous media, but ~~[[being]]~~ is insoluble or only poorly soluble ~~therein~~ in an aqueous media.
